

October 18, 1976

Manager
Pete's Radiator Service
1101 Boonville
Springfield, Missouri 65802

Dear Sir:

This letter is to confirm the conversation this office had with personnel at your radiator repair shop.

On October 15, 1976, surveillance and enforcement personnel observed what appeared to be radiator coolant that had been drained on the south side of your building. This material left your property and flowed east along the curb of Scott Street to the intersection of Boonville where it flowed south to a storm sewer opening.

Please be advised that the discharge of pollutants constitutes a violation of City, State, and Federal Laws. Those laws provide for severe penalties for the discharge of such materials. This office maintains periodic surveillance throughout the corporate limits of the City, and will watch this area closely.

If we may be of any assistance or can answer any questions, please do not hesitate to call.

Yours truly,

Eugene Pabst
Water Pollution Control Inspector III
Surveillance & Enforcement
